Dear Jenny,

We have now heard back from Mr Glasspool regarding filming of the Inquiry, who states the following:-

"In response to your questions regarding the filming of proceedings, this would be done by documentary film-makers [REDACTED] and [REDACTED] of [REDACTED] Ltd. They have been following developments during the regeneration of Elephant & Castle and its impact on residents for some time. In response to your second question, they wish to film not just our submissions but the whole proceedings."

As Katharine Reed explained in her initial email the Council is reluctant to allow for the proceedings to be filmed as it might dissuade other members of the public from speaking as they may not necessarily wish their images or statements to be recorded. Many of the witnesses would also feel uncomfortable about giving evidence whilst being filmed.

The Council does however recognise that the final decision rests with the Inspector, and if a decision is taken to allow filming we would of course accommodate this.

Kind Regards,

Dear Katharine

I have approached the Inspector regarding this request. The Inspector is broadly sympathetic to the concerns you raise but would like more information before she responds.

Would it be possible for you to obtain a little more information about the proposed filming - is the request from one individual or a group or is this a media request? What is the basis of

the request: who would undertake the filming and is it intended to film the objector's own submission only or the whole of the proceedings?

I look forward to hearing from you.

Kind regards

Jenny

Dear Jenny

we have had a request from one of the objectors that the proceedings could be filmed. The Council is reluctant to allow this for various reasons, not least that this might dissuade people from speaking who would otherwise have done so. Ultimately the decision rests with the Inspector and we would be grateful if you could ascertain the position with regard to filming.

Regards

Katharine
